

Rubber Component Reproduction Aftercare

BDesigns rubber component reproductions are guaranteed for 6 months only against workmanship and materials. Regular use, abuse or accidents are not covered. Take care when re-installing these components.

General Rubber Component Aftercare

- **Wash these parts with warm water and soap and you would normally wash the vehicle.**
- **Never use any corrosive cleaners, thinners, paint cleaners or any solvents at all. These can break down the material.**
- **Products such as Armour-All can be used on these components.**
- **We recommend using is Forever Black periodically (once per year). It is a plastic and vinyl dye that impregnates the surface of the plastic.**
